

File Folders Tasks Kit Follow Written Directions

Sort by States

Note: Therapist takes all data sheets out of folders. Sets 1 of each the colored folders on table: (1 red, 1 green, 1 yellow, 1 blue). Instructs person to follow the directions below

Alternative: This can be done by sorting by categories such as age, eye color

Look at the data sheets and find what state the person is from.

Put the people from North Carolina in the Green folder

Put anyone from Washington into the Red folder

Put all the people from Utah into the Yellow folder

Put all the other people from the rest of the states into the Blue folder

Sort by Variables

Note: Therapist puts out all of the folders with data sheets. Instructs person to follow directions below.

Alternative: This can be done by sorting by other categories such as age, eye color

Use all of the folders to follow the directions below:

Put all of the data sheets of people who weigh more than 145 lbs and have brown eyes into a pile.

Next pick out the people who are males and have yellow stickers on their data sheets and put them in a second pile.

From the folders that remain, select the people whose contact person is their wife and put them in a third pile.

From the last of the folders, pick out all of the people who are NOT from Utah and put them in a fourth pile.

How many data sheets are in the 4th pile? _____
