

1. If you bought bananas for 45 cents and oranges for \$1.20 and gave the clerk \$2, what would your change be?
2. If you read 61 pages yesterday and 89 pages today and there were 223 pages in all, how many pages are left?
3. A woman weighing 120 lbs and a man weighing 205 lbs are on the elevator. If the capacity is six times that, what is the capacity?
4. If you save \$10 a week for 7 weeks and need \$110, how many more weeks would you need to save \$10?
5. If you spend \$11 on nails, \$25 for lumber and received \$4 change, how much did you give the salesperson?
6. You want \$500 for Christmas presents and already saved \$185, if you only have 7 weeks left, how much would you have to put aside each week to make up the difference?
7. You earn 1.5 vacation days per month and worked 10 months. If you have taken 3 vacation days, how many days are left?
8. There are 95 people in the room, 15 women and 27 of the men were smoking. How many people were not smoking?
9. You bought 6 cans of soup at 30 cents apiece and 4 loaves of bread at 65 cents apiece. How much over \$4 is the total cost?
10. There are 8 rows with 7 people in each row and 11 rows with 6 people in each row. If the total seating capacity is 150, how many seats are empty?
